

PIW

“Pneumatic Innovative Wiper”

PIW

ARTIC SEALS

RASCHIATORE BIDIREZIONALE TIPO PIW

DESCRIZIONE

Il raschiatore bidirezionale PIW “ Pneumatic Innovative bi-directional Wiper” è stato studiato per eliminare le perdite dovute a imperfezioni di lavoro nelle sedi delle testate dei cilindri pneumatici.

Testate che possono essere in materiale plastico rinforzato con fibre di vetro o in alluminio fuso lavorate ad utensile.

La particolare forma del profilo, con rilievi sul lato statico esterno, elimina completamente le perdite dovute a : tagli, segni di lavorazione d’utensile, ovalizzazioni e conicità di sforno nelle testate in plastica.

LIMITI D’IMPIEGO

Pressione: < 20 [bar]
Velocità: < 1 [m/s]
Temperatura: da - 35 °C a +90°C
Fluidi : aria (lubrificata e non) grassi minerali.
Vedi tabella 1 compatibilità pag. 12

MATERIALE

Il materiale utilizzato è un poliuretano di durezza 90 Shore A
Codice materiale: B0

MONTAGGIO

Il montaggio avviene in cava chiusa.
Si consiglia di eliminare spigoli vivi e bave per non danneggiare la tenuta durante la fase di montaggio.

- 1- Distanziali stabilizzatori per evitare back-pumping
- 2- Rilievi per vincere le imperfezioni delle sedi
- 3- Ampio raggio per creare effetto molla utile alle basse pressioni
- 4- Raggio sul labbro dinamico per diminuire l’attrito di primo distacco
- 5- Raggiatura per rendere maggiormente elastico il labbro statico

BI-DIRECTIONAL WIPER TYPE PIW

DESCRIPTION

The bi-directional wiper PIW “ Pneumatic Innovative bi-directional Wiper” is design in order to eliminate the shrinkage due to the imperfection of the working in the groove of pneumatic head cylinders.

The pneumatic head cylinder can be made in plastic material filled with glass fibers or cast aluminum with machined tool.

The particular shape of the profile, with reliefs on the external static side completely eliminates shrinkage due to: cut, signs of machine tool, ovality and taper draft in plastic head cylinders.

TECNICAL DATA

Pressure: < 20 [bar]
Speed: < 1 [m/s]
Temperature: from - 35 °C to +90°C
Fluids : air (lubricate or not) mineral grease.
See compatibility Table 1, page 12

MATERIAL

The material used is Polyurethane with hardness 90 Shore A
Material code: B0

ASSEMBLING

The assemblin is on closed groove.
Eliminate sharps and burrs to avoid damage the seal during the assembling.

- 1- Stabilizers spacers to avoid back-pumping
- 2- Reliefs to win imperfection of the groove
- 3- Big radius to create spring effect usefull at low pressure
- 4- Radius on dynamic lip to decrease friction breakaway
- 5- Radius to make more flexible static lip
